

PROFESSIONAL SUMMARY:

- Staff Software Engineer with 12+ years of experience architecting and delivering high-performance web applications and component libraries.
- Proven expertise in **React**, **TypeScript**, Node.js, and modern JavaScript frameworks with demonstrated success **optimizing page load** speeds by 40% and leading cross-functional teams.
- Specialized in building **scalable** front-end solutions, implementing CMS platforms, and establishing component-driven architectures that serve millions of users.
- Strong track record of **mentoring engineering** teams and driving technical excellence through **code quality initiatives** and comprehensive testing strategies.
- Earned the **Anthropic Claude Certified Architect** certification, demonstrating advanced expertise in AI architecture, agentic systems, prompt engineering, MCP, context optimization, and enterprise AI application development.
- Pioneered **Devin Cloud** adoption across the organization by building automations, scheduled tasks, reusable blueprints, and skills that streamlined end-to-end **workflows**, along with custom **MCP** servers and **RAG** tools.
- Built **apps** using AI for day trading, built trade history view with **charts** and detailed breakdown for **Robinhood** and extended to other brokers. Created auto trading bots using broker's APIs.

TECHNICAL SKILLS:

Programming Languages	:	JavaScript (ES6), React JS, TypeScript, Redux, Node JS
Web Technologies	:	HTML5, CSS3, Bootstrap, RESTful, LESS, SASS, webpack
IDE Tools	:	VS Code, IntelliJ
AI	:	Claude Code, Prompt engineering, MCPs , Agents , and AI workflows

PROFESSIONAL EXPERIENCE:

ServiceNow, Santa Clara, CA

Oct 2018 – Present

Staff Software Engineer - Full Stack

- Architected and delivered enterprise-scale **component library** serving 20+ ServiceNow applications, enabling marketing teams to deploy customer events, campaigns, and product launches 60% faster
- Led technical onboarding and mentored 8+ mid-level engineers, **reducing ramp-up** time by 50% through structured training programs and code review processes
- Built ServiceNow **AI Agent platform** UI, developing **orchestrator** framework for multi-agent coordination, intelligent model selection system, and **RAG** tools enabling context-aware AI responses.
- Engineered 50+ reusable **React** components with Storybook documentation, increasing development velocity by 40% and ensuring UI consistency across digital properties (**AEM**)
- Developed custom React hooks for local **storage management** and API integration, reducing boilerplate code by 35% and improving test coverage to 85%
- Implemented mobile-first **responsive design** using SCSS, achieving 100% cross-browser compatibility.
- Integrated RESTful APIs for real-time data presentation, supporting internal tools used by 500+ employees and customer-facing applications
- Established **code quality** standards and conducted 200+ code reviews, reducing production bugs by 30% and maintaining 85%+ code coverage
- Evaluated and upgraded technologies including React 18, TypeScript 5.0, and Webpack 5 to modernize stack

Intel Corporation, San Jose, CA

Feb 2018 – Sept 2018

Full stack Developer

- Delivered seamless Altera-Intel web integration project, migrating 30+ pages and **localizing content** for 12 international markets

- Built 15+ custom AEM components enabling business users to create and manage content autonomously, reducing **developer dependency** by 70%
- Engineered **responsive web solutions** using Node.js, JavaScript, SASS, achieving 98% cross-browser compatibility across desktop and mobile platforms
- Collaborated with UX designers and backend teams to deliver pixel-perfect implementations meeting WCAG 2.0 accessibility standards

Apple Inc., Cupertino, CA

June 2016 – Jan 2018

UI Developer

- Developed and **localized** Apple product webpages for 20+ product lines across 15 international markets, supporting millions of customer interactions
- Architected reusable **React.js component library** with 25+ components, accelerating feature development by 50% for internal applications
- Engineered solutions to resolve 40+ AEM rendering issues, with consistent user experience across platforms

Goji (Consumer United), Boston, MA (start-up)

Feb 2016 – May 2016

Web UI Developer

- Delivered complete auto insurance shopping platform using AngularJS SPA architecture, achieving 2-second average page load time across mobile and desktop
- Built real-time analytics dashboard tracking performance metrics for 50+ insurance agents across multiple time periods with live data visualization

AT&T Corp., Arlington Heights, IL (Internship)

July 2015 – Nov 2015

Full Stack Web Developer

- Modernized legacy JavaScript app by migrating to Handlebars.js and AngularJS, improving maintainability.
- Integrated RESTful API calls to enable dynamic data fetching, reducing page refresh requirements and enhancing user experience
- Designed and developed responsive HTML5/CSS3 web templates with rich internet application features, resolving 25+ cross-browser compatibility issues

Nielsen, Chicago, IL (Internship)

March 2015 – June 2015

Web UI/UX Developer

- Engineered data visualization SPA using ExtJS framework, creating interactive charts and graphs for complex analytics datasets
- Implemented MVC architecture and resolved 30+ browser compatibility issues across Internet Explorer, Firefox, and Chrome, achieving 100% cross-browser support

SIDE PROJECTS:

Discord Bots - [Link](#), **Browser Extensions** - [Link](#), and Building apps that solve real problems.

EDUCATION:

Illinois Institute of Technology, Chicago, IL

Master of Science - Information Technology and Management

Dec 2015

GPA: 3.6/4.0

CERTIFICATIONS:

- **Claude Certified Architect** – Foundations - 2026
- Microsoft Specialist – Programming in HTML5 with JavaScript and CSS3 - 2014
- Android Application Developer – 2015
